

H. Leutwyler, manuscripts and publications

1. Sur une modification des théories penta-dimensionnelles, destinée à éviter certaines difficultés de la théorie de Jordan-Thiry, Comptes rendus des séances de l'Académie des Sciences, **251** (1960) 2292.
2. Solution statique à symétrie sphérique en théorie penta-dimensionnelle, Archives des Sciences, Genève **13** (1960) 549.
3. Lizentiatsarbeit Universität Bern, 1960, Leitung: Prof. M.A. Tonnelat
I. Die Beziehungen zwischen den verschiedenen Versionen der fünfdimensionalen unitären Feldtheorie
II. Die sphärische Lösung der Gleichungen $R_{\mu\nu} = 0$.
4. Zur 5-dimensionalen unitären Feldtheorie: der Kleinsche Ansatz periodischer Felder (mit J. Schaer), Helv. Phys. Acta **35** (1962) 335.
5. Verallgemeinerte Eichinvarianz und zugeordnete Bosonfelder, Helv. Phys. Acta **35** (1962) 337.
6. γ_5 -ambiguity in the generally covariant spin affine connection (with J.R. Klauder and J. Schaer), Nuovo Cim. **23** (1962) 1099.
7. PhD thesis, University of Bern, 1962, supervisor: Prof. J.R. Klauder
Generally covariant Dirac equation and associated boson fields, Nuovo Cim. **26** (1962) 1060.
8. Gravitational field: equivalence of Feynman quantization and canonical quantization, Phys. Rev. **134** (1964) B1155.
9. Some remarks on the boundary value problem in General Relativity (with J.R. Klauder), Helv. Phys. Acta **38** (1965) 241.
10. Group-theoretical basis of the angular momentum Helmholtz theorem of Lomont and Moses, Nuovo Cim. **37** (1965) 543.
11. A no-interaction theorem in classical relativistic Hamiltonian particle mechanics, Nuovo Cim. **37** (1965) 556,
reprinted in *The theory of action-at-a-distance in relativistic particle dynamics*, ed. E.H. Kerner, Gordon and Breach, New York (1972).

12. Symmetry breaking solutions of the Thirring model, *Helv. Phys. Acta* **38** (1965) 231.
13. A 2 + 1 dimensional model for the quantum theory of gravity, *Nuovo Cim.* **42A** (1966) 159.
14. Electromagnetic currents in $SL(6,C)$, *Phys. Rev. Lett.* **17** (1966) 156.
15. Dynamical symmetries and symmetry algebras (with E.C.G. Sudarshan), *Phys. Rev.* **156** (1967) 1637.
16. Relativistically invariant solutions of current algebras at infinite momentum (with H. Bebie), *Phys. Rev. Lett.* **19** (1967) 618.
17. A new method for the analysis of unitary representations of $SL(n,C)$ (with V. Gorgé), *Helv. Phys. Acta* **41** (1968) 171.
18. The baryon-meson vertex in $SL(6,C)$ (with V. Gorgé), *Helv. Phys. Acta* **41** (1968) 195.
19. Current algebra: a simple solution with nontrivial mass spectrum, *Phys. Rev. Lett.* **20** (1968) 561.
20. Current algebra and infinite component fields (with H. Bebie, F. Ghielmetti and V. Gorgé), *Phys. Rev.* **177** (1969) 2133.
21. On an infinite component field model of the local vector and axial vector current algebra (with H. Bebie, F. Ghielmetti and V. Gorgé), *Phys. Rev.* **177** (1969) 2146.
22. Boundary conditions for the state functional in quantum theory of gravity, in *Battelle Rencontres 1967: Lectures in Mathematics and physics*, Benjamin, New York (1968).
23. Models of local current algebra, Lectures given at VII Internationale Universitätswochen für Kernphysik, Schladming, 1968, *Acta Physica Austriaca*, Suppl. V (1968).
24. Spectral function sum rules and lightlike surfaces, preprint Univ. of Bern (1968), unpublished.

25. Is the group $SU(3)_\ell$ an exact symmetry of one-particle-states ? preprint Univ. of Bern (1968), unpublished.
26. Current algebra and lightlike charges, in Proc. Karlsruhe Summer Institute 1968, Springer Tracts in Modern Physics **50** (1969) 29.
27. Quantum field theory on lightlike slabs (with J.R. Klauder and L. Streit), Nuovo Cim. **66A** (1970) 536.
28. Singularities of current commutators on the light cone (with J. Stern), Nucl. Phys. **B20** (1970) 77.
29. Local current algebra model with linear trajectories, Phys. Lett. **B31** (1970) 214.
30. New dispersion sum rules for inelastic e-p-scattering (with J. Stern), Phys. Lett. **B31** (1970) 458.
31. Light-cone structure of infinite-component fields (with H. Bebie and V. Gorgé), Annals Phys. **74** (1972) 524.
32. Some remarks concerning the parton model, Lecture given at the Coral Gables conference on Fundamental Interactions at High Energy, Tracts in Mathematics and the Natural Sciences, Gordon and Breach, New York Vol. **2** (1971) 113.
33. On the status of the local current algebra programme, Lecture given at the Karpacz Winter School, Wroclaw (1971).
34. Gauge invariance and scaling in resonance models for the vertex (contribution to the Festschrift in honour of M. Fierz), Helv. Phys. Acta **45** (1972) 182.
35. Superlocal sources, in *Magic without Magic: John Archibald Wheeler*, ed. J.R. Klauder, Freeman Co., San Francisco (1972) 187.
36. On acceleration and motion of ions in corona and solar wind (with J. Geiss and P. Hirt), Solar Phys. **12** (1970) 458.
37. Einführung in die Spezielle Relativitätstheorie, Beitrag zum Weiterbildungskurs für Gymnasiallehrer, Brunnen, 9.-12. Oktober 1972.

38. Spezielle Relativitätstheorie, Vorlesungsskript, Wintersemester 1971/72.
39. Theoretical problems in deep inelastic scattering (with P. Otterson), in *Scale and Conformal Symmetry*, ed. R. Gatto, John Wiley & Sons, New York (1973), p. 1.
40. Currents on the light cone, in Proc. Summer Institute on Theoretical Physics, Kaiserslautern, 1972, Lecture Notes in Physics, Springer Verlag, Berlin **17** (1972) 245.
41. Light cone and mass shells (with J. Jersak and J. Stern), Nucl. Phys. **B57** (1973) 413.
42. Light cone and fixed mass limits (with J. Jersak and J. Stern), Phys. Lett. **B44** (1973) 105.
43. On causality tests for inelastic electron scattering, in Proc. Int. Conf. on Mathematical Problems of Quantum Field Theory and Quantum Statistics, Moscow (1972).
44. Partons in the light of the cone, Lectures given at XII Internationale Universitätswochen für Kernphysik, Schladming, 1973, Acta Physica Austriaca, Suppl. XI (1973) 117.
45. Advantages of the color octet gluon picture (with H. Fritzsche and M. Gell-Mann), Phys. Lett. **B47** (1973) 365.
46. On the average transverse momentum of the quarks within a meson, Phys. Lett. **B48** (1974) 45.
47. Light cone physics and PCAC, Lectures given at the Adriatic Summer Meeting on Particle Physics, Rovinj, in *Particle Physics*, ed. Martinis, Pallua and Zovko, North-Holland (1974).
48. Zur Relativitätstheorie, Skript zum Kolloquium Wintersemester 1972/73.
49. Mesons in terms of quarks on a null plane, Nucl. Phys. **B76** (1974) 413.
50. Is the quark mass as small as 5 MeV ? Phys. Lett. **B48** (1974) 431
51. Light cone algebra, fixed mass sum rules and PCAC (with H. Fritzsche and M. Gell-Mann), Caltech-68-456 (1974), unpublished.

52. Current commutators in the hadronic vacuum and e^+e^- annihilation (with H. Fritzsch), Phys. Rev. **D10** (1974) 1624.
53. Statistische Mechanik in klassischer und moderner Physik (mit H. Bebie), Weiterbildungskurs VSMP, Brunnen (1974).
54. Implications of scaling for the proton-neutron mass difference (with J. Gasser), Nucl. Phys. **B94** (1975) 269.
55. Electron- and neutrino-scattering on nucleons: currents and the symmetries they generate, in Proc. Topical Meeting On Intermediate Energy Physics, Zuoz (1975) 1.
56. Why are the quarks so light ?, in Proc. Topical Seminar on Deep Inelastic and Inclusive Processes, Sukchumi (1974).
57. The decay $\pi \rightarrow e\nu\gamma$: PCAC and the quark model (with T. Go), Nucl. Phys. **B118** (1977) 493.
58. Covariant quantum mechanics on a null plane (with J. Stern), Phys. Lett. **B69** (1977) 207.
59. Relativistic dynamics on a null plane (with J. Stern), Annals Phys. **112** (1978) 94.
60. Covariant interactions of two spinless particles: all local solutions of the angular condition (with J. Stern), Nucl. Phys. **B133** (1978) 115.
61. Harmonic confinement: a fully relativistic approximation to the meson spectrum (with J. Stern), Phys. Lett. **B73** (1978) 75.
62. The story of the great week that ended with the big bang, in Proc. Spring School on Weak Interactions and Gauge Theories, Zuoz (1978).
63. Hard gluon exchange corrections to harmonic confinement (with J. Jersak and J. Stern), Phys. Lett. **B77** (1978) 399.
64. Quarks, Leptonen und ihre Wechselwirkungen, Vierteljahresschrift der Naturforschenden Gesellschaft Zürich **126** (1981) 165.
65. Local spin $\frac{1}{2}$ wave equations and harmonic confinement (with J. Stern), Nucl. Phys. **B157** (1979) 327.

66. Hadrons, Lectures given at the 1979 GIFT Seminar on Quantum Chromodynamics, Jaca (Huesca, Spain), ed. J.L. Alonso and R. Tarrach, Lecture notes in Physics, Springer Verlag, Berlin **118** (1980) 321.
67. Confining potential based on local wave equations (with J. Gasser, J. Jersak and J. Stern), *Helv. Phys. Acta* **53** (1980) 77.
68. On the spin and flavour dependence of the confining potential (with J. Gasser, J. Jersak and J. Stern), unpublished.
69. Chromodiamagnetism, Lectures given at NATO Advanced Study Inst. on Field Theoretical Methods in Elementary Particle Physics, Kaiserslautern 1979, ed. W. Rühl, Plenum Publishing Co., New York (1980).
70. Hadrons and chromodiamagnetism, Proc. Symposium on Lepton and Hadron Interactions, Visegrad, Hungary, 1979, ed. F. Csikor, G. Pintér and G. Pocsik, Budapest (1980) 227.
71. Vacuum fluctuations surrounding soft gluon fields, *Phys. Lett.* **B96** (1980) 154.
72. On the Dirichlet problem of chromodynamics, *Phys. Lett.* **B95** (1980) 80.
73. Constant gauge fields and their quantum fluctuations, *Nucl. Phys.* **B179** (1981) 129.
74. How to use heavy quarks to probe the QCD vacuum, *Phys. Lett.* **B98** (1981) 447.
75. On the status of QCD, in Proc. VIth International Conference on Mathematical Physics, Berlin 1981, Lecture Notes in Physics, Springer Verlag, Berlin **153** (1982) 397, BUTP-81/16.
76. Quark masses (with J. Gasser), *Phys. Reports* **87** (1982) 77.
77. On the low energy structure of QCD (with J. Gasser), *Phys. Lett.* **B125** (1983) 321.
78. Low energy theorems as precision tests of QCD (with J. Gasser), *Phys. Lett.* **B125** (1983) 325.

79. Chiral perturbation theory to one loop (with J. Gasser), *Annals Phys.* **158** (1984) 142.
80. Chiral perturbation theory: expansions in the mass of the strange quark (with J. Gasser), *Nucl. Phys.* **B250** (1985) 465.
81. Low energy expansion of meson form factors (with J. Gasser), *Nucl. Phys.* **B250** (1985) 517.
82. $\eta \rightarrow 3\pi$ to one loop (with J. Gasser), *Nucl. Phys.* **B250** (1985) 539.
83. On the vacuum angle in QCD, CERN-TH-3739 (1983), unpublished.
84. Determination of the elements V_{us} and V_{ud} of the Kobayashi-Maskawa matrix (with M. Roos), *Z. Phys. C - Particles and Fields* **25** (1984) 91.
85. Testing QCD with current algebra, Lectures given at 6th Warsaw Symp. on Elementary Particle Physics, Kazimierz, Poland, May 30 - June 3, 1983, *Acta Physica Polonica* **B15** (1984) 383.
86. Quark masses and chiral symmetry, in Proc. XXII International School of Subnuclear Physics, Erice, 1984, *Quarks, Leptons and Their Constituents*, ed. A. Zichichi, Plenum Press (1988), BUTP-32/84.
87. Chiral fermion determinants and their anomalies, *Phys. Lett.* **B152** (1985) 78.
88. On the determinant of the Weyl operator, in *Quantum Field Theory and Quantum Statistics*, essays in honour of E.S. Fradkin, Adam Hilger Publ. Co., Bristol (1986) 327, BUTP-84/33.
89. Gravitational anomalies: a soluble two-dimensional model, *Phys. Lett.* **B153** (1985) 65 [Erratum-ibid. **155B** (1985) 469].
90. Explicitly translation invariant prescription for the contributions of the gluon condensate (with W. Kummer and G. Wirthumer), *Nuovo Cim. Lett.* **42** (1985) 187.
91. Anomalies, Stueckelberg Memorial Lecture, Lausanne, June 1985, *Helv. Phys. Acta* **59** (1986) 201, BUTP-85/13, reprinted in *The Fundamental Interaction - Geometrical Trends*, ed. J. Debrus and A. C. Hirshfeld, Plenum Press, New York (1988).

92. Gravitational anomalies (with S. Mallik), *Z. Phys. C - Particles and Fields* **33** (1986) 205, BUTP-85/23.
93. Light quarks at low temperatures (with J. Gasser), *Phys. Lett.* **B184** (1987) 83, BUTP-86/19.
94. Thermodynamics of chiral symmetry (with J. Gasser), *Phys. Lett.* **B188** (1987) 477, BUTP-87/2.
95. Energy levels of light quarks confined to a box, *Phys. Lett.* **B189** (1987) 197, BUTP-87/4.
96. Weyl fermions on strings embedded in three dimensions (with F. Langouche), *Z. Phys. C - Particles and Fields* **36** (1987) 473, BUTP-87/5.
97. Anomalies generated by extrinsic curvature (with F. Langouche), *Z. Phys. C - Particles and Fields* **36** (1987) 479, BUTP-87/6.
98. Two-dimensional fermion determinants as Wess-Zumino actions (with F. Langouche), *Phys. Lett.* **B195** (1987) 56, BUTP-87/7.
99. Low temperature expansion in QCD, in *Proc. International Europhysics Conference on High Energy Physics, Uppsala, Sweden, June 1987*, ed. Olga Botner, Uppsala University Vol. I (1987) 320, BUTP-87/12.
100. Fermions on two-dimensional surfaces: anomalies of the general effective action, in *Proc. International Europhysics Conference on High Energy Physics, Uppsala, Sweden, June 1987*, ed. Olga Botner, Uppsala University Vol. I (1987) 383.
101. The origin and significance of chiral and gravitational anomalies, in *The Fundamental Interaction - Geometrical Trends*, *Proc. of a meeting held Feb. 16 - 20, 1987 at Bad Honnef (Germany)*, ed. J. Debrus and A. C. Hirshfeld, Plenum Press, New York (1988), pp. 67-91.
102. QCD low temperature expansion and finite size effects, in *Proc. International Symposium on Field Theory on the Lattice, Seillac, France, September 1987*, ed. A. Billoire, R. Lacaze, A. Morel, O. Napoly and J. Zinn-Justin, *Nucl. Phys. B (Proc. Suppl.)* **4** (1988) 248, BUTP-87/20.
103. Spontaneously broken symmetries: effective Lagrangians at finite volume (with J. Gasser), *Nucl. Phys.* **B307** (1988) 763, BUTP-87/22.

104. Comment on *Better way to measure f_π* (with J. Gasser), BUTP-88/6, unpublished.
105. Hadrons below the chiral phase transition (with P. Gerber), Nucl. Phys. **B321** (1989) 387, BUTP-88/30.
106. Chiral perturbation theory - strong and semileptonic weak interactions, in Proc. Ringberg Workshop on Hadronic Matrix Elements and Weak Decays, Ringberg Castle, Germany, April 1988, ed. A.J. Buras, J.-M. Gérard and W. Huber, Nucl. Phys. B (Proc. Suppl.) **7A** (1989) 42, BUTP-88/25.
107. Extracting the pion-nucleon sigma-term from data (with J. Gasser, M.P. Locher and M. Sainio), Phys. Lett. **B213** (1988) 85, BUTP-88/13.
108. Chiral Lagrangians for massive spin-1 fields (with G. Ecker, J. Gasser, A. Pich and E. de Rafael), Phys. Lett. **B223** (1989) 425, BUTP-89/4.
109. Goldstone bosons generate peculiar anomalies (with M. Shifman), Phys. Lett. **B221** (1989) 384.
110. Finite size effects and spontaneously broken symmetries: the case of the O(4) model (with A. Hasenfratz, K. Kansen, J. Jersak, C.B. Lang and T. Neuhaus), Z. Phys. C - Particles and Fields **46** (1990) 257, FSU-SCRI 89-42.
111. On the chiral phase transition, in Proc. XI Warsaw Symposium on Elementary Particle Physics, Kazimierz, Poland, May 1988, *New Theories in Physics*, ed. Z. Ajduk, S. Pokorski and A. Trautman, World Scientific, Singapore (1989) 116, reprinted in *Symmetry violations in Subatomic Physics*, ed. B. Castel and P.J. O'Donnell, World Scientific, Singapore (1989) 57, BUTP-88/27.
112. On the mean free path of pions in hot matter (with J. Goity), Phys. Lett. **B228** (1989) 517, PSI-PR-89-08.
113. m_u is not equal to zero, Nucl. Phys. **B337** (1990) 108, BUTP-89/39.
114. Goldstone boson related finite size effects in field theory and critical phenomena with O(N) symmetry (with P. Hasenfratz), Nucl. Phys. **B343** (1990) 241, BUTP-89/28.

115. Light Higgs particle decays of K and η mesons (with M. Shifman), Nucl. Phys. **B343** (1990) 369, BUTP-89/29.
116. Finite temperature scalar field theory in the early universe (with S. Mallik), Annals Phys. **205** (1991) 1, BUTP-90/1.
117. The decay of a light Higgs boson (with J.F. Donoghue and J. Gasser), CERN-TH 5644/90, Nucl. Phys. **343** (1990) 341, BUTP-89/06.
118. Nucleons at finite temperature (with A. Smilga), Nucl. Phys. **B342** (1990) 302, BUTP-90/8.
119. Dirac determinant and Chern-Simons action, (contribution to the Festschrift on the occasion of the sixtieth birthday of G. Wanders), Helv. Phys. Acta **63** (1990) 660, BUTP-90/11.
120. Kinetics of an expanding pion gas (with P. Gerber and J. Goity), Phys. Lett. **B246** (1990) 513, BUTP-90/16.
121. Goldstone bosons and finite size effects: a numerical study of the O(4) model (with A. Hasenfratz, K. Jansen, J. Jersak, H.A. Kastrup, C.B. Lang and T. Neuhaus), Nucl. Phys. **B356** (1991) 332, DESY 90-077.
122. Shape of the constraint effective potential (with M. Göckeler), Nucl. Phys. **B350** (1991) 228, BUTP-90/28.
123. The constraint effective potential for O(N)-symmetric spin models (with M. Göckeler), Phys. Lett. **B253** (1991) 193, BUTP-90/32.
124. Charge correlations and topological susceptibility in QCD (with F.C. Hansen), Nucl. Phys. **B350** (1991) 201, BUTP-90/34.
125. Sigma-term update (with M. Sainio and J. Gasser), Phys. Lett. **B253** (1991) 252, BUTP-90/30.
126. Form factor of the σ -term (with M. Sainio and J. Gasser), Phys. Lett. **B253** (1991) 260, BUTP-90/31.
127. Constraint correlation functions in the O(N) model (with M. Göckeler), Nucl. Phys. **B361** (1991) 392, BUTP-90/46.

128. On the effective action of the WZNW-model, contribution to the Festschrift for R. Gatto and H. Ruegg, *Helv. Phys. Acta* **64** (1991) 842, BUTP-91/08.
129. Perturbation theory in the Wess-Zumino-Novikov-Witten model (with M. Shifman), *Int. J. Mod. Phys.* **A7** (1992) 795, BUTP-91/6.
130. The role of the entropy in an expanding hadronic gas (with H. Bebie, P. Gerber and J. Goity), *Nucl. Phys.* **B378** (1992) 95, BUTP-91/4.
131. Chiral effective Lagrangians, Lectures given at XXX Int. Universitätswochen für Kernphysik, Schladming and at Theoretical Advanced Study Institute, Boulder (1991), publ. in *Recent Aspects of Quantum Fields*, H. Withter and M. Gausterer (eds.), *Lecture Notes in Physics*, Springer-Verlag, Berlin, **396** (1991) 1 and in *Perspectives of the Standard Model*, R. K. Ellis, C. T. Hill and J. D. Lykken (eds.) World Scientific, Singapore (1992), BUTP-91/26.
132. Why some tops tip, contribution to the Festschrift for M. Roos, Report Series of the Research Institute for High Energy Physics, University of Helsinki, HU-SEFT-1991-19, reprinted in *Eur. J. Phys.* **15** (1994) 59.
133. Strange quark content of the nucleon (with J. Gasser and M. Sainio), in Proc.12th Int. Conf. Particles and Nuclei, Cambridge, Mass., June 1990, Abstract III/29, T. W. Donnelly (ed.) and in Proc. *Pion-nucleon physics and the structure of the nucleon*, Bad Honnef (1991) 56.
134. Restoration of chiral symmetry, in *Effective Field Theories of the Standard Model*, Proc. Workshop held in Dobogokö, Hungary, Aug. 1991, U.-G. Meissner (ed.), World Scientific, Singapore (1992) 193, BUTP-91/43.
135. Deconfinement and chiral symmetry, in Proc. Conf. *QCD 20 years later*, Aachen, Germany, 1992, P. M. Zerwas and H. A. Kastrup (eds.), World Scientific, Singapore, Vol. 2 (1993) 693.
136. Clausius and Clapeyron in QCD, *Phys. Lett.* **B284** (1992) 106, BUTP-92/05.

137. Spectrum of the Dirac operator and role of winding number in QCD (with A. Smilga), Phys. Rev. **D46** (1992) 5607, BUTP-92/10.
138. Energy and momentum in chiral theories (with J. F. Donoghue), Z. Phys. C - Particles and Fields **52** (1991) 343.
139. Nonperturbative methods, Rapporteur talk given at XXVI Int. Conf. on High Energy Physics, Dallas, Aug. 1992, J.R. Sanford (ed.), AIP Conf-Proc. No. 272 (1993) 185, BUTP-92/42.
140. Thermodynamics of quarks and gluons, in *On Klauder's Path: A Field Trip*, Essays in Honor of J. R. Klauder, ed. by G. G. Emch, G. C. Hegerfeldt and L. Streit, World Scientific, Singapore (1994).
141. On the foundations of chiral perturbation theory, Annals Phys. **235** (1994) 165, BUTP-93/24, hep-ph/9311274.
142. Nonrelativistic effective Lagrangians, Phys. Rev. **D49** (1994) 3033, BUTP-93/25, hep-ph/9311264.
143. Masses of the light quarks, in *Yukawa couplings and the origins of mass*, Proc.2nd IFT Workshop, University of Florida, Gainesville, Feb. 1994, P. Ramond (ed.), International Press, Cambridge, Mass. 1996, BUTP-94/8, hep-ph/9405330.
144. Principles of chiral perturbation theory, in Proc. Workshop *Hadron Physics 1994*, Gramado, Brasil, April 1994, E. Herscovitz, C. Vasconcellos and E. Ferreira (eds.), World Scientific, Singapore, 1995, and in *Selected topics in nonperturbative QCD*, Varenna, Italy, June/July 1995, A. Di Giacomo and D. Diakonov (eds.), Società italiana di fisica, IOS Press, BUTP-94/13, hep-ph/9406283.
145. Goldstone bosons, in Proc. Bose Centennial Conf., Calcutta, India, Jan. 1994, BUTP-94/17, hep-ph/9409422.
146. Foundations and scope of chiral perturbation theory, in *Chiral Dynamics: Theory and Experiment*, Proc. Workshop held at MIT, Cambridge, Mass., Juli 1994, A. M. Bernstein and B. R. Holstein (eds.), Springer-Verlag, Berlin, 1995 and in *Modern View of Hadronic Matter*, Proc. 9th Nishinomiya–Yukawa Memorial Symposium, Nishinomiya, Japan,

- Oct. 1994, T. Suzuki (eds.), Universal Academy Press, Tokyo, 1995, BUTP-94/18, hep-ph/9409423.
147. Chiral perturbation theory, in *The Heart of the Matter*, Proc. Rencontres de Blois, France, June 1994, J.-F. Mathiot and J. Trân Than Vân (eds.), Editions Frontières, Gif-sur-Yvette, France (1995) and in *Physics with GeV-Particle Beams*, Proc. Int. Conf. held at Jülich, Germany, Aug. 1994, H. Machner and K. Sistemich (eds.), World Scientific, Singapore (1995), BUTP-94/19.
 148. The role of the η' in determinations of the light quark masses, in Proc. Meeting on Particle Physics in Honour of Haridas Banerjee, Indian J. Phys. **70A** (1996) 305.
 149. Bounds on the light quark masses, Phys. Lett. **B374** (1996) 163, hep-ph/9601234.
 150. Implications of η - η' mixing for the decay $\eta \rightarrow 3\pi$, Phys. Lett. **B374** (1996) 181, BUTP-96/5, hep-ph/9601236.
 151. Dispersive analysis of the decay $\eta \rightarrow 3\pi$ (with A. V. Anisovich), Phys. Lett. **B375** (1996) 335, BUTP-95/2, hep-ph/9601237.
 152. The masses of the light quarks, in Proc. Int. Conf. on Fundamental Interactions of Elementary Particles, ITEP, Moscow, Oct. 1995, J. Moscow Phys. Soc. **6** (1996) 1, CERN-TH-96-25, hep-ph/9602255.
 153. The ratios of the light quark masses, Phys. Lett. **B378** (1996) 313, CERN-TH-96-44, hep-ph/9602366.
 154. Light quark effective theory, in *Effective theories and fundamental interactions*, in Proc. 34th International School of Subnuclear Physics, Erice, Italy, July 3-12, 1996, ed. A. Zichichi, World Scientific, Singapore (1997), hep-ph/9609465.
 155. Phonons as Goldstone bosons, contribution to the Festschrift for Klaus Hepp and Walter Hunziker, Helv. Phys. Acta **70** (1997) 275, hep-ph/9609466.
 156. Light quark masses, in “Masses of Fundamental Particles: Cargèse 1996”, eds. M. Lévy, J. Iliopoulos, R. Gastmans and J.-M. Gérard (Plenum Press, New York and London 1997), hep-ph/9609467.

157. Probing the quark condensate by means of $\pi\pi$ scattering, in Proc. DAΦCE Workshop “Hadron Dynamics with the New DAΦNE and CEBAF Facilities”, Frascati, Nov. 1996, eds. R. Baldini, E. De Sanctis, G. Pancheri and G. Ricco, Nucl. Phys. **A623** (1997) 169c, hep-ph/9709406.
158. On the $1/N$ -expansion in chiral perturbation theory, in Proc. QCD 97, Montpellier, France, July 1997, ed. S. Narison, Nucl. Phys. Proc. Suppl. **64** (1998) 223, hep-ph/9709408.
159. Pseudoscalar decay constants at large N_c (with R. Kaiser), in Proc. Workshop “Nonperturbative Methods in Quantum Field Theory”, NITP/CSSM, University of Adelaide, Australia, Feb. 1998, eds. A.W. Schreiber, A.G. Williams and A.W. Thomas, World Scientific, Singapore (1998), hep-ph/9806336.
160. Baryon chiral perturbation theory in manifestly Lorentz invariant form (with T. Becher), Eur. Phys. J. **C9** (1999) 643, BUTP-99/1, hep-ph/9901384.
161. Effective field theory of the pion-nucleon interaction, in Proc. MENU99, Zuoz, Switzerland, 16-20 Aug 1999, πN Newslett. **15** (1999) 1, hep-ph/0008123.
162. Roy equation analysis of $\pi\pi$ scattering (with B. Ananthanarayan, G. Colangelo and J. Gasser), Physics Reports **353** (2001) 207, BUTP-99/33, hep-ph/0005297.
163. Large N_c in chiral perturbation theory (with R. Kaiser), Eur. Phys. J. **C17** (2000) 623, hep-ph/0007101.
164. The $\pi\pi$ S -wave scattering lengths (with G. Colangelo and J. Gasser), Phys. Lett. **B488** (2000) 261, hep-ph/0007112.
165. Chiral dynamics, in *At the frontier of Particle Physics, Handbook of QCD, Boris Ioffe Festschrift*, ed. M. Shifman, World Scientific, Singapore (2001), **1**, 271, hep-ph/0008124.
166. Non-lattice determinations of the light quark masses, in Proc. *Lattice 2000*, Bangalore, India, August 2000, Nucl. Phys. B (Proc. Suppl.) **94** (2001) 108, hep-ph/0011049.

167. Theoretical chiral dynamics, in *Chiral Dynamics 2000, Theory and Experiment III, Jefferson Laboratory, Newport News, Virginia, USA, July 2000*, eds. A.M. Bernstein, J.L. Goity and U.-G. Meissner, World Scientific, Singapore (2001), hep-ph/0011140.
168. The quark condensate from K_{e_4} decays (with G. Colangelo and J. Gasser), *Phys. Rev. Letters* **86** (2001) 5008, hep-ph/0103063.
169. $\pi\pi$ scattering (with G. Colangelo and J. Gasser) BUTP-01/1, *Nucl. Phys.* **B603** (2001) 125, hep-ph/0103088.
170. Low energy analysis of $\pi N \rightarrow \pi N$ (with T. Becher) BUTP-01/11, *JHEP* **0106** (2001) 017, hep-ph/0103263
171. Pion Physics at Low Energy and High Accuracy, in *QCD@Work, International Workshop on Quantum Chromodynamics: Theory and Experiment, Martina Franca, Italy, June 2001*, eds. P. Colangelo and G. Nardulli, AIP Conference Proceedings, **602** (2001) 3, hep-ph/0107332
172. Strong interactions at low energies, in Proc. of the 14th Summer School of Physics, *Understanding the structure of hadrons*, Prague, July 9-13, 2001, *Czechoslovak Journal of Physics Suppl. B* **52** (2002) 9, hep-ph/0212325.
173. Symmetries of QCD, in Proc. Workshop "Light-cone physics: particles and strings", Trento, Italy, Sept. 2-11 2001, *Nucl. Phys. B (Proc. Suppl.)* **108** (2002) 37.
174. $\pi\pi$ scattering: Theory is ahead of experiment, talk given at the 10th Mexican School of Particles and Fields, Playa del Carmen, Mexico, 30 Oct. - 6 Nov. 2002, in *Particles and Fields*, eds. U. Cotti, M. Mondragón and G. Tavares-Velasco, AIP conference Proceedings, Volume 670, p. 45 (Melville, New York 2003), hep-ph/0212323.
175. Electromagnetic form factor of the pion, in *Continuous Advances in QCD 2002*, eds. K A. Olive, M. A. Shifman and M. B. Voloshin, World Scientific, Singapore (2003), p. 23, hep-ph/0212324.
176. Concluding remarks, in Proc. Workshop on Hadronic Atoms, CERN, Jan. 2003, eds. L. Afanasyev, A. Lanaro and J. Schacher, hep-ph/0301266.

177. On the precision of the theoretical predictions for $\pi\pi$ scattering (with I. Caprini, G. Colangelo and J. Gasser), Phys. Rev. D **68** (2003) 074006, hep-ph/0306122.
178. Scalar form factors of light mesons (with B. Ananthanarayan, I. Caprini, G. Colangelo and J. Gasser), Phys. Lett. **B602** (2004) 218, hep-ph/0409222.
179. Theoretical aspects of the pion pion interaction (with I. Caprini and G. Colangelo), Proc. Int. Conf. on QCD and Hadronic Physics, Beijing, China, June 16 - 20, 2005, published in Int. J. Mod. Phys. A **21** (2006) 954, hep-ph/0509266.
180. Mass and width of the lowest resonance in QCD (with I. Caprini and G. Colangelo), Phys. Rev. Lett. **96** (2006) 132001, hep-ph/0512364.
181. Model independent determination of the lowest resonance of QCD, in Proc. Conf. on *Continuous Advances in QCD 2006*, University of Minnesota, Minneapolis, USA, 11 - 14 May 2006, ed. M. Peloso and M. Shifman, World Scientific, Singapore (2007)
182. Mass and width of the sigma, in Proc. 9th International Workshop on Meson Production, Properties and Interaction, *MESON 2006*, Krakow, Poland, 9 - 13 June 2006, Int. J. Mod. Phys. **A22** (2007) 257, hep-ph/0608218.
183. On the dispersion theory of $\pi\pi$ scattering, in Proc. *Quark Confinement and the Hadron Spectrum VII*, Ponta Delgada, Azores, Portugal, 2-7 September 2006, ed. J. E. Ribeiro, AIP Conference Proceedings, **892** (2007) 58, hep-ph/0612111.
184. $\pi\pi$ scattering, in Proc. 5th International Workshop on *Chiral Dynamics, Theory & Experiment*, Durham/Chapel Hill, NC, USA, September 18 - 22, 2006, eds. M. W. Ahmed, H. Gao, H. R. Weller and B. Holstein, World Scientific, Singapore (2007), pp. 17-29, hep-ph/0612112.
185. Insights and puzzles in light quark physics, in *2007 QCD and High Energy Hadronic Interactions*, Proc. 42nd Rencontres de Moriond, La Thuile, Italy, March 2007, eds. Etienne Augé, Bolek Pietrzyk and Jean Trân Thanh Vân, The Gioi Publishers, Hanoi (2007), pp. 71-76, arXiv:0706.3138 [hep-ph].

186. Physics of the light quarks, in Proc. *International School of Subnuclear Physics, 45th course: Search for the 'Totally Unexpected' in the LHC era*, Erice, Italy, 29 August-7 September 2007, ed. A. Zichichi, World Scientific, Singapore (2009) arXiv:0808.2825.
<http://www.ccsem.infn.it/issp2007/>
187. On the significance of recent lattice results for the chiral Lagrangian, in Proc. *4th International Conference on Flavor Physics (ICFP)*, Beijing, China, 24–28 September 2007, eds. Chun Liu and Tian-Jun Li, *Int. J. Mod. Phys. A* **23** (2008) 3187.
188. Model independent determination of the σ pole, in Proc. Workshop on *Scalar Mesons and Related Topics*, honouring the 70th birthday of Michael Scadron, Lisbon, Portugal, Feb. 11-16, 2008, eds. G. Rupp et al., *AIP Conf. Proc.* **1030** (2008) 46, arXiv:0804.3182.
189. On the low energy end of the QCD spectrum, in Proc. *QCD 08*, Montpellier, France, July 2008, ed. S. Narison, *Nucl. Phys. B (Proc. Suppl.)* **186** (2009) 338, arXiv:0809.5053.
190. Recent developments in the physics of light quarks, in Proc. *Confinement and the Hadron Spectrum VIII*, Mainz, Germany, Sept. 1-6, 2008, **PoS** (Confinement8) 068, arXiv:0812.4165.
191. Light quark masses, in Proc. *6th International Workshop on Chiral Dynamics*, Bern, Switzerland, July 6-10, 2009, **PoS** (CD09) 005, arXiv:0911.1416.
192. Review of lattice results concerning low energy particle physics (with G. Colangelo, S. Dürr, A. Jüttner, L. Lellouch, V. Lubicz, S. Necco, C. T. Sachrajda, S. Simula, A. Vladikas, U. Wenger, H. Wittig), *Eur. Phys. J.* **C71** (2011) 1695, arXiv:1011.4408.
193. Regge analysis of the $\pi\pi$ scattering amplitude, (with I. Caprini and G. Colangelo), *Eur. Phys. J.* **C72** (2012) 1860, arXiv:1111.7160.
194. Chiral Perturbation Theory, *Scholarpedia*, 7(10):8708.

195. On the history of the strong interaction, *Lectures given at the International School of Subnuclear Physics*, Erice, Italy, June 23 - July 2, 2012, *Mod. Phys. Lett.* **A29** (2014) 1430023, arXiv:1211.6777.
DOI: 10.1142/S0217732314300237
196. The mass of the two lightest quarks, in *Proc. Determination of the Fundamental Parameters of QCD*, Singapore, March 18 - 22, 2013, *Mod. Phys. Lett.* **A28** (2013) 1360014, arXiv:1305.6839.
DOI: 10.1142/S0217732313600146.
197. Review of lattice results concerning low energy particle physics (with S. Aoki *et al.*), *Eur. Phys. J. C* **74** (2014) 2890, arXiv:1310.8555.
DOI:10.1140/epjc/s10052-014-2890-7.
198. Insights and puzzles in particle physics, in *50 Years of Quarks*, ed. H. Fritzsch and M. Gell-Mann, World Scientific, Singapore (2015) 163, arXiv:1410.4000, reprinted in *Int. J. Mod. Phys. A* **30** (2015) 1530010.
DOI:10.1142/S0217751X15300100.
199. Cottingham formula and nucleon polarisabilities (with J. Gasser, M. Hoferichter and A. Rusetsky), *Eur. Phys. J. C* **75** (2015) 8, 375, arXiv:1506.06747.
DOI:10.1140/epjc/s10052-015-3580-9.
200. Theoretical aspects of Chiral Dynamics, *Proc. 8th International Workshop on Chiral Dynamics*, Pisa, Italy, June 29 - July 3, 2015, **PoS** (CD15) 022, arXiv:1510.07511.
